Re: DNS 15-009

Dear Ms. Wood:

Thank you for the opportunity to comment on the determination of nonsignificance for the Colockum Wildlife culvert and road repair project, proposed by Washington Department of Fish and Wildlife. We have reviewed the documents and have the following comments.

SHORELANDS/ENVIRONMENTAL ASSISTANCE

Submitted maps for site 4 (Brewton Gulch Road) are confusing. The drawing itself says site 3 but the labeling at the bottom of the sheet says site 4. The maps are labeled as profiles, but the drawings look like they are cross sections. Text in the checklist implies that the road prism area will be the same as the existing road prism, but this drawing appears to show a 4-fold increase in cross section. Site 1 drawings should show the location of the referenced spring and any site wetlands that are present. If there are any wetland impacts, the size of those impacts should be described within the SEPA document. If culverts are proposed, they should be shown on the road profile drawings.

If you have any questions or would like to respond to these Shorelands/Environmental Assistance comments, please contact **Catherine Reed** at (509) 575-2616 or email at catherine.reed@ecy.wa.gov.

Sincerely,

Gwen Clear
